# STRIP

MACHINE FOR THE PRODUCTION OF HIGH QUALITY ''STRIP'' BRUSHES.

STRIP ensures very high production speed thanks to an automatic feeding unit for synthetic fibers. A manually loaded fiber stock-box is also available and enables the machine to run natural fibers. The machine includes a trimming unit and an optional "coiling" unit and/or "bending" unit.

## Technical Data

| | STRIP S | STRIP XL |
|---|---|---|
| Max folded strip width (mm) | 8 | 12 |
| Min folded strip width (mm) | 3 | 6 |
| Speed (meters/minute) | 30 | 20 |
| Max fiber length – automatic loader (mm) | 200 | 200 |
| Min fiber length – automatic loader (mm) | 45 | 45 |
| Max fiber length – natural (mm) | 220 | 220 |
| Min fiber length – natural (mm) | 35 | 35 |
| Power consumption (kW) | 5.5 | 7.0 |
| Air consumption (nL/min) | 500 | |
| Weight (kg) | 2800 | |
| Dimensions (mm) | L - 7000 | |
| | W - 1100 | |
| | H - 2000 | |
